

AgriEdge Excelsior: Proven. Trusted. Secure.

For progressive growers seeking to enhance productivity, AgriEdge Excelsior® from Syngenta is the only proven whole-farm program that combines secure data management, innovative product choices and trusted on-farm service, to help growers maximize and sustain their return on investment.

For more than fifteen years, Syngenta has helped growers better manage their business.

TECHNOLOGY

Land.db®, the premium, exclusive farm management software designed to help increase your return on investment

STEWARDSHIP

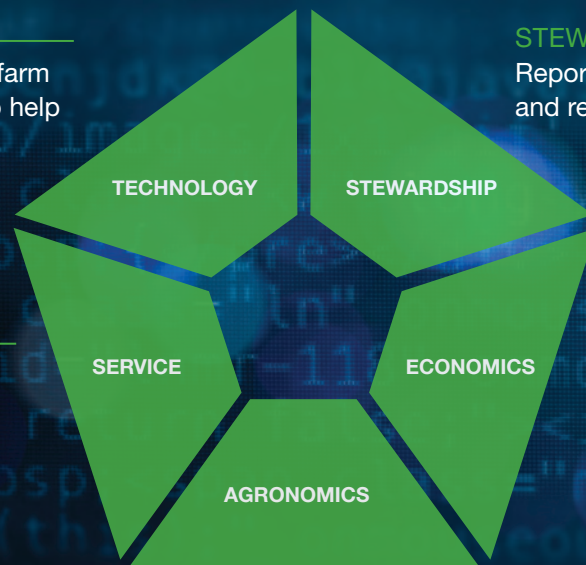

Reporting and mapping for sustainability and regulatory compliance

SERVICES

Dedicated professional team of on-farm AgriEdge® specialists, web- and phone-based support from Ag Connections, and reseller service and support

ECONOMICS

Ability to measure field-level profitability, mitigate risk in crop production and financing for Syngenta crop inputs

AGRONOMICS

Integrated crop planning and prescription recommendations through software and partnerships as well as access to a complete portfolio of products

DESIGNED BY FARMERS FOR FARMERS

How can Land.db help me?

Farm inputs tracked by entity, farm, field or crop zone

GIS field mapping, infrastructure mapping, border crop and sensitive area identification

Manage product inventories, pricing and invoicing

Store and query data based on field attributes (crop, tillage, varieties, irrigation etc.)

Active ingredient threshold monitoring

Robust crop planning and budgeting

Generate work orders in English and Spanish and include PPE/WPS

Capture, store and report key sustainability metrics

Record harvest information for any crop or field
