This is a specimen label and may be inaccurate or out of date. It is intended as a guide in providing general information regarding use of this product. Always read and follow the EPA approved label on the product container.
DACONIL® WEATHER STIK® Flowable Fungicide is an excellent disease control agent when used according to label directions for control of a broad spectrum of plant diseases. DACONIL WEATHER STIK® Flowable Fungicide is recommended for use in programs which are compatible with the principles of Integrated Pest Management (IPM), which include the use of disease-resistant crop varieties, cultural practices, pest scouting, and disease forecasting systems which reduce unnecessary applications of pesticides.

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

NOTE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather, presence of other materials or other influencing factors in the use of the product, which are beyond the control of ZENECA or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold ZENECA and Seller harmless for any claims relating to such factors.

ZENECA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions not reasonably foreseeable to or beyond the control of Seller or ZENECA, and Buyer and User assume the risk of any such use. ZENECA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall ZENECA or Seller be liable for any incidental, consequential or special damage or handling for this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF ZENECA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF ZENECA OR SELLER, THE REPLACEMENT OF THE PRODUCT.

ZENECA and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of ZENECA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The instructions in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 48 hours.

PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls, waterproof gloves, shoes plus socks, and protective eyewear.

DACONIL® WEATHER STIK® Flowable Fungicide is an excellent disease control agent when used according to label directions for control of a broad spectrum of plant diseases. DACONIL WEATHER STIK® Flowable Fungicide is recommended for use in programs which are compatible with the principles of Integrated Pest Management (IPM), which include the use of disease-resistant crop varieties, cultural practices, pest scouting, and disease forecasting systems which reduce unnecessary applications of pesticides.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, aquatic invertebrates, and marine/estuarine organisms. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. DO NOT apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. DO NOT apply when weather conditions favor drift from treated areas. Apply only to areas specified on label. DO NOT contaminate water when disposing of equipment wash waters.

Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if swallowed or absorbed through the skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Avoid contact with skin. Avoid breathing spray mist. DO NOT get in eyes or on clothing. DO NOT take internally.

NOTE TO PERSONAL PROTECTIVE EQUIPMENT (PPE) and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 48 hours.

DISEASES LISTED ARE CAUSED BY FUNGI, SOME OF WHICH ARE NAMED AS FOLLOWS:

1. Dollar Spot: *Sclerotinia homeocarpa; Lanzia* or *Moellerodiscus* spp.
2. Leaf Spot, Melting-out: *Drechslera* spp. (including *D. poae* and *D. siccans*), *Bipolaris sorokiniana*, *Curvularia* spp.
4. Red Thread: *Laetisaria fuciformis*
5. Anthracnose: *Colletotrichum graminicola*
6. Copper Spot: *Gloeocercospora sorgii*
7. Stem Rust: *Puccinia graminis*

Gray Snow mold caused by *T pylhula* spp. — Apply in sufficient water to obtain adequate coverage (2 to 10 gallons per 1,000 square feet). Apply 5% to 11% fluid ounces of DACONIL WEATHER STIK Flowable Fungicide per 1,000 square feet of turf area. Application must be made before snow cover in autumn. Use the higher rate if turf layer remains frozen prior to snow cover. If snow cover is intermittent or lacking during the winter, reapply DACONIL WEATHER STIK Flowable Fungicide at 5% fluid ounces per 1,000 square feet at monthly intervals until gray snow mold conditions no longer prevail. In areas where pink snow mold (*Gerlachia* or *Fusarium* patch) is likely to occur, apply DACONIL WEATHER STIK Flowable Fungicide at 5% fluid ounces per 1,000 square feet in combination with products containing either benomyl at 1 ounce active ingredient per 1,000 square feet, or iprodione at 2 ounces active ingredient per 1,000 square feet of turf area. Read and observe all label directions for products containing these active ingredients.

**Fusarium (Gerlachia) Patch:** For control of Fusarium patch only in areas where snow cover is intermittent or lacking during the winter, apply 5% to 9% fluid ounces of DACONIL WEATHER STIK Flowable Fungicide per 1,000 square feet of turf area. Begin applications in late autumn and reapply at 21- to 28-day intervals until conditions favorable for Fusarium patch no longer prevail.

**Algae:** For prevention of algae on turfgrasses, apply DACONIL WEATHER STIK Flowable Fungicide at the rate of 2% to 4% ounces per 1,000 square feet on a 7- to 14-day schedule. Under severe algae conditions, use the high rate and apply on a 7-day schedule. When algae is well established, every attempt should be made to dry out the afflicted area. Once dry, spiking or verticutting should be done to enhance turfgrass recovery in conjunction with DACONIL WEATHER STIK Flowable Fungicide applications at the rate of 4% to 7% ounces per 1,000 square feet on a 7- to 14-day schedule. Several applications of DACONIL WEATHER STIK Flowable Fungicide at the high rate may be necessary for turfgrass recovery. Only a preventive spray program with DACONIL WEATHER STIK Flowable Fungicide will prevent a recurrence of the algae when environmental conditions are favorable.

**ORNAMENTAL PLANTS**

Apply DACONIL WEATHER STIK Flowable Fungicide at a rate of 1% pints per 100 gallons of water unless other directions are given in the following tables. Apply in a spray to runoff, when conditions are favorable for disease development. Repeat applications at 7- to 14-day intervals until conditions are no longer favorable. During periods when conditions favor severe disease incidence, generally cloudy or wet weather, apply DACONIL WEATHER STIK Flowable Fungicide at 7-day intervals. DACONIL WEATHER STIK Flowable Fungicide should be applied to plants when both foliage and flowers are dry, or nearly dry.

DO NOT combine DACONIL WEATHER STIK Flowable Fungicide in the spray tank with pesticides, surfactants, or fertilizers, unless your prior use has shown the combination to be physically compatible, effective, and noninjurious under your conditions of use.

DACONIL WEATHER STIK Flowable Fungicide may be used in greenhouses. DO NOT use mislabelers or high-pressure spray equipment when making applications of DACONIL WEATHER STIK Flowable Fungicide in greenhouses.

Use of DACONIL WEATHER STIK Flowable Fungicide is recommended for control of fungal diseases referred to by numbers in parentheses following each ornamental. Ornamentals listed on this label have been tested and found to tolerate applications of DACONIL WEATHER STIK Flowable Fungicide at the recommended rates. The user should test for possible phytotoxic responses, using recommended rates on ornamental plants on a small area prior to commercial use. Applications made during bloom may damage flowers and/or fruits.

**FRUITS AND OTHER STRUCTURES WHICH MAY BE BORNE ON TREATED PLANTS MUST NOT BE EATEN.**
ORNAMENTALS RECOMMENDED FOR TREATMENT WITH DACONIL WEATHER STIK FLOWABLE FUNGICIDE

Broadleaf Shrubs and Trees

Andromeda (Pieris) (4) Holly (1)
Ash (Fraxinus) (1) Lilac (5)
Aspen (1) Magnolia (1)
Azalea (1,2,4) Maple (1)
Buckeye, Horse-chestnut (1) Mountain-laurel (1)
Cherry-laurel (1) Oak (Red Group only) (1,7)
Crabapple (1,2,3) Oregon Grape (Mahonia) (6)
Dogwood (1) Photinia (1)
Eucalyptus (1) Privet (Ligustrum) (1)
Fire-thorn (Pyracantha) (1,2) Rhododendron (1,2,4)
Flowering Almond (1,2) Sand Cherry (1,2)
Flowering Cherry (1,2) Sequoia (1)
Flowering Peach (1,2) Spirea (1)
Flowering Plum (1,2) Sycamore, Plane-tree (1)
Flowering Quince (1,2) Vibernum (5)
Hawthorn (1,8) Walnut (Juglans) (1)

Flowering Plants* and Bulbs

Arabian Violet (2) Iris (1,2)
Begonia (1) Lily (1)
Carnation (1) Marigold (1)
Carnation (1,2) Narcissus (1)
Chrysanthemum (1,2) Pansy (1)
Crucus (1) Petunia (1,4)
Daffodil (1) Phlox (1)
Daisy (1) Poinsetta* (1)
Geranium (1,6) Rose* (1)
Gladiolus (1,2) Statice (1)
Hollyhock (6) Tulip (1)
Hydrangea (Foliage only) (1,6) Zinnia (1,5)

Foliage Plants

Aglaonema (1) Lipstick-plant (1)
Areca Palm (1) Ming Aralia (1)
Artemesia (1) Oyster-plant (Rhoeo) (1)
Boston Fern (1) Pachysandra* (1)
Draecaena (1) Parlour Palm (Chamaedorea) (1)
Dumb-cane (Diffenbachia) (1) Peperomia (1)
Fatsia (1) Philodendron (1,4)
Ficus (1) Prayer-plant (Amaranta) (1)
Florida Ruffle Fern (1) Syngonium (1)
Leather-leaf Fern (1) Zebrina (1)

*Avoid applications during bloom period on plants where flower injury is unacceptable.

*Discontinue applications prior to bract formation; phytotoxicity is possible on the bracts.

*Use 1 pint per 100 gallons of water.

*Use 2 1/4 pints of DACONIL WEATHER STIK Flowable Fungicide per 100 gallons of water.

DISEASES CONTROLLED WITH DACONIL WEATHER STIK FLOWABLE FUNGICIDE

1. Leaf Spot/Foliar Blight:
   - Actinomelte Leaf Spot
   - Alternaria Leaf Spot/Leaf Blight
   - Anthracnose Leaf Blotch, Spot
   - Ascochyta Blight
   - Bipolaris (Helminthosporium) Leaf Spot
   - Black Spot on Roses
   - Botrytis Leaf Spot, Leaf Blight
   - Cephaleosporum Leaf Spot
   - Cercospora Leaf Spot
   - Cercosporidium Leaf Spot
   - Dactylaria Leaf Spot
   - Didymella Leaf Spot
   - Drechslera Leaf Spot
   - Fabreia (Entomosporium) Leaf Spot
   - Fusarium Leaf Spot
   - Gloeosporium Black Leaf Spot
   - Ink Spot (Drechslera)
   - Marrsonina Leaf Spot
   - Monilinia Bloom Blight, Twig Blight
   - Mycosphaerella Ray Blight
   - Myrothecium Leaf Spot, Brown Rot
   - Nematostoma Leaf Blight
   - Pseudolatexa Leaf Spot
   - Ramularia Leaf Spot
   - Rhizoctonia Web Blight
   - Septoria Leaf Spot
   - Sphaeropsis Leaf Spot
   - Stagonospora Leaf Scorch
   - Tan Leaf Spot (Curvularia)
   - Volutella Leaf Blight

2. Flower Spot/Blight:
   - Botrytis Leaf Spot, Flower Blight
   - Curvularia Flower Spot
   - Monilinia Blossom Blight

3. Cylindrocladium Stem Canker

4. Pythophthora Leaf Blight, Dieback

5. Powdery Mildew
   - Erysiphe cichoracearum

6. Rust
   - Gymnosporangium spp.
   - Puccinia spp.

7. Taphrina Blister

8. Scab (Venturia inaequalis)

The following ornamental plant species which have been tested with DACONIL WEATHER STIK Flowable Fungicide at recommended rates did not exhibit phytotoxicity:

NOTE: DO NOT apply DACONIL WEATHER STIK Flowable Fungicide to either green or variegated Pittosporum or to Schefflera, as multiple applications have been demonstrated to cause phytotoxic responses.

TREE AND ORCHARD CROPS: Apply DACONIL WEATHER STIK Flowable Fungicide in sufficient water and with proper calibration to obtain uniform coverage of the tree canopy. Application with ground equipment is preferable to aerial application because ground applications generally give better coverage of the tree canopy. If application with ground equipment is not feasible, DACONIL WEATHER STIK Flowable Fungicide may be applied with aircraft using at least 20 gallons of spray per acre. When concentrate sprays are used or when treating nonbearing or immature trees, the lower rate of DACONIL WEATHER STIK Flowable Fungicide listed may be used. DO NOT allow live-stock to graze in treated areas. The following spray volumes are recommended as gallons of spray per acre:

<table>
<thead>
<tr>

*Volumetric rates to be used only with full dilute spray volume specified on this label for tree and orchard crops.
A. Center Pivot, Motorized Lateral Move, and Traveling Gun Irrigation Equipment

For injection of pesticides, these continuously moving systems must use a positive displacement injection pump, of either diaphragm or piston type, constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock and capable of injection at pressures approximately 2 to 3 times those encountered within the irrigation water line. Venturi applicator units cannot be used on these systems.

Fill chemical supply tank of injection equipment with water. Operate system for 1 complete revolution or run across the field, measuring time required, amount of water injected, and acreage covered.

Thoroughly mix recommended amount of DACONIL WEATHER STIK Flowable Fungicide for acreage to be covered into same amount of water used during calibration and inject into system continuously for 1 revolution or run. Mixture in the chemical supply tank must be continuously agitated during the injection run. Shut off injection equipment after 1 revolution or run, but continue to operate irrigation system until DACONIL WEATHER STIK Flowable Fungicide has been cleared from last sprinkler head.

B. Solid Set and Portable (Wheel Move, Side Roll, End Tow, or Hand Move) Irrigation Equipment

With stationary systems, an effectively designed in-line Venturi applicator unit is preferred which is constructed of materials that are compatible with pesticides; however, a positive-displacement pump can also be used.

Determine acreage covered by sprinkler. Fill tank of injection equipment with water and adjust flow to use contents over a 30- to 45-minute period. Mix desired amount of DACONIL WEATHER STIK Flowable Fungicide for acreage to be covered with water so that the total mixture of DACONIL WEATHER STIK Flowable Fungicide plus water in the injection tank is equal to the quantity of water used during calibration, and operate entire system at normal pressures recommended by the manufacturer of injection equipment used for amount of time established during calibration. Agitation is recommended. DACONIL WEATHER STIK Flowable Fungicide can be injected at the beginning or end of the irrigation cycle or as a separate application. Stop injection equipment after treatment is completed and continue to operate irrigation system until DACONIL WEATHER STIK Flowable Fungicide has been cleared from last sprinkler head.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

STORAGE: Store in a cool place.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, pesticide spray, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent); then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
