Ridomil Gold/Bravo is a wettable powder packaged in a water-soluble bag. See directions for use on right side of container. This outer protective container contains Ridomil Gold/Bravo in an inner water-soluble bag. Entire inner bag and contents dissolve in water. After opening outer container, immediately dump entire unopened inner bag into the partially filled sprayer or mix tank. Do not handle the soluble bag or expose it to moisture, since this may cause rupturing.

KEEP OUT OF REACH OF CHILDREN.

DANGER/PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

See additional precautionary statements on left side of container.

Statement of Practical Treatment
If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention immediately.

If swallowed: Drink promptly a large quantity of milk, egg whites, gelatin solution or, if none of these are available, large quantities of water and induce vomiting by touching back of throat with finger. Avoid alcohol. Do not induce vomiting or give anything by mouth to an unconscious person. Call a physician or Poison Control Center.

If inhaled: Remove victim to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. Get medical attention immediately.

If on skin: Wash with plenty of soap and water. Get medical attention.

Note to Physician: If swallowed, probable mucosal damage may contraindicate gastric lavage. If in eyes, specialized ophthalmologic attention may be required.

**CONDITIONS OF SALE AND LIMITATION OF LIABILITY AND BAILIFF**

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffective-ness or other unintended consequences may result because of such factors as manner of use, application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of SYNGENTA CROP PROTECTION, Inc. or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold SYNGENTA and Seller harmless for any claims relating to such factors.

SYNGENTA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the forego-ing conditions of sale and limitations of warranty and liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any such use, SYNGENTA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall SYNGENTA or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. The EXCLUSIVE REMEDY OF SELLER, THE REPLACEMENT OF THE PRODUCT.

SYNGENTA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE (INCLUDING STRICT LIABILITY OR OTHERWISE) RESULTING FROM USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF SYNGENTA OR SELLER, THE EXCLUSIVE REMEDY OF THE PURCHASER.

SYNGENTA and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and excep-tions pertaining to the application of this product on the label as personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) extended from the PPE requirements for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Coveralls
- Waterproof gloves
- Shoes plus socks
- Protective eyewear

**FAILURES TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR DISEASE CONTROL, CROP INJURY, AND/OR ILLE-GAL RESIDUES.**

**GENERAL INFORMATION**

Ridomil Gold®/Bravo contains 4.5% Ridomil Gold active ingredient and 72% of the active ingredient chlorothalonil. Ridomil Gold is a systemic fungicide that provides control of downy mildew and late blight diseases of selected crops. Chlorothalonil is a broad-spectrum protectant fungicide that controls many diseases of vegetables.

**Note:** Ridomil Gold active ingredient is a systemic fungicide having a specific mode of action and could be subject to development of insensitive strains of fungi. Development of insensitivity cannot be predicted. Therefore, SYNGENTA cannot assume liability for crop damage resulting from insensitive strains of fungi. If treatment is not effective following the use of the product as recommended, an insensitive strain of fungi may be present. If the treatment is ineffective due to the presence of a Ridomil Gold insensitive strain of fungi, neither Ridomil Gold/Braze nor any other fungicides with a similar mode of action will effectively control that disease. Consideration should then be given to the prompt use of other types of suitable fungicides. Consult with your State Agricultural Experiment Station or Extension Service Specialist for guidance on your particular crop and disease control situation.

**Mixing Instructions**

Ridomil Gold/Braze is an effective fungicide when used according to label directions for control of a broad spectrum of plant diseases. Thorough, uniform coverage is essential for disease control. Prepare nozzle spray mixture than is needed for the immediate application. Thoroughly clean spray equipment before using this product. Vigorous agita-tion is necessary to dissolve the bag and disperse the product. Maintain maximum agita-tion throughout the spray operation. Do not let the spray mixture stand overnight in the spray tank. Flush the spray equipment thoroughly following each use and apply the rinsate to a previously treated area.

Amount of water needed per acre will vary with crop and amount of plant growth. Apply a minimum of 20 gals./A for dilute sprays and 5 gals./A for concentrate ground sprays and aerial applications.

To avoid spray drift, do not apply under windy conditions. Avoid spray overlap, as crop injury may result.

Precaution: Water-soluble bags of Ridomil Gold/Braze must be completely dissolved and dispersed in plain water before any other tank-mix partner, including micronutrients or other liquid or dry fertilizers, are added to the spray solution. Boron, especially in the form of a micronutrient additive, such as a borax solution, etc. or as a natural component of the water, may prevent water-soluble bags from dissolving.

Ridomil Gold/Braze Alone: Add 1/4 of the required amount of plain water to the spray or mixing tank. With the agita-tor running, drop the required number of unopened soluble bags of Ridomil Gold/Braze into the tank all at once. Continue agitation while adding the remainder of the water. Begin application of the spray solution after the pouches have dis-solved, and the material has completely dispersed into the mix water. Maintain agitation until all of the mixture has been applied.

Ridomil Gold/Braze + Tank Mixtures: Ridomil Gold/Braze is usually compatible with most commonly used insecticides, fungicides, and spray adjuvants. When using Ridomil Gold/Braze in a tank mixture with other pesticides, observe the most restrictive label limi-tations and precautions of the products being used.

Add 1/4 of the required amount of plain water to the spray or mixing tank. With the agita-tor running, drop the required number of unopened soluble bags of Ridomil Gold/Braze, and all other products packaged in similar water-soluble bags, into the tank all at once. After the water-soluble bags have dissolved and the products have completely dispersed uni-formly into the mix water, continue to fill the tank with water. Then add the desired amount of other products recommended for the mixture and allow them to become completely dispersed. Continue agitation while adding the remainder of the water and during applica-tion to maintain a uniform suspension.

**Preharvest Intervals**

Unless otherwise stated in the directions for use in a specific crop, there is no preharvest interval.

**Application Through Irrigation Systems**

Ridomil Gold/Braze alone or in combination with other fungicides which are registered for use in irrigation systems may be applied through irrigation systems.

Apply this product only through center pivot, solid set, hand move, or moving wheel irri-gation systems. Do not apply this product through any other type of irrigation system. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from improper distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers, or other experts. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide-label-prescribed safety devices for public water systems are in place. A person knowledgeable of the chemistry of the system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**Posting Requirements**

Pozing of areas to be chemigated is required when (1) any part of a treated area is within 300 ft. of a sensitive area such as residential areas, labor camps, businesses, day care centers, hospitals, in-patient clinics, nurseries, or any public areas such as schools, schools playgrounds, or other public facilities, not including public buildings, and (2) the chemigated area is open to the public such as golf courses or retail greenhouses.

Posting must conform to the following requirements. Treated areas shall be posted with signs at all usual points of entry and along likely routes of approach from the listed sen-sitive areas. When there are no usual points of entry, signs must be posted in the corners of the treated areas and in any other location affording maximum visibility to sensitive areas. The printed side of the sign should face away from the treated area towards the sensitive area. The signs shall be printed in English. Signs must be posted prior to appli-cation and must remain posted until foliage has dried and soil surface water has disap-peared. Signs may remain in place indefinitely as long as they are composed of materials to prevent deterioration and maintain legibility for the duration of the posting period.

All words shall consist of letters at least 1/2 inches tall, and all letters and the symbol shall be a color which sharply contrast with their immediate background. At the top of the sign, the words KEEP OUT shall be printed in capital letters at least 8 inches in diameter containing the word STOP below the symbol shall be the words PESTICIDES IN IRRIGATION WATER.

This product is in addition to any sign posted to comply with the Worker Protection Standard.

**Operating Instructions**

1. The system must contain a functional check-valve, vacuum relief valve, and low pres-sure drain appropriately located on the irrigation pipeline to prevent water-source contam-ination from backflow.

2. The pesticide injection pipeline must contain a functional, automatic, quick-closing check-valve to prevent the flow of fluid back toward the injection pump.

3. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

4. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

5. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
6. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

7. Do not apply when wind speed favors drift beyond the area intended.

**Application Instructions**

**Ridomil Gold/Braavo** must be applied on the schedule specified in the specific crop use recommendations, not according to the irrigation schedule. If irrigation schedules are used, ground or aerial applications must supplement chemigation applications to achieve adequate disease control.

With the exception of potatoes, Ridomil Gold/Braavo has not been sufficiently tested when applied through irrigation systems to assure consistent product performance for all labeled uses. The following calibration and application techniques are provided for general reference, but do not constitute a warranty of fitness for application through sprinkler irrigation equipment. Users should check with state and local regulatory agencies for potential use restrictions before applying any agricultural chemical through sprinkler irrigation equipment.

**Center Pivot Irrigation Equipment**

Notes:

(1) Use only with drive systems which provide uniform water distribution.

(2) Do not use end guns when chemigating Ridomil Gold/Braavo through center pivot systems because of non-uniform application.

(3) Plug the first nozzle closest to well head to protect water source.

1. Determine the size of the area to be treated.

2. Determine the time required to apply 1/4 inch water over the area to be treated when the system and injection equipment are operated at normal pressures as recommended by the equipment manufacturer. Run the system at 80-95% of the manufacturer’s rated capacity.

3. Using water, determine the injection pump output when operated at normal line pressure.

4. Determine the amount of Ridomil Gold/Braavo required to treat the area covered by the irrigation system.

5. Add the required number of Ridomil Gold/Braavo soluble bags and sufficient water to meet the injection time requirements to the solution tank. (See Mixing Instructions section of the label.)

6. Make sure the system is fully charged with water before starting injection of the Ridomil Gold/Braavo solution. Time the injection to last at least as long as it takes to bring the system to full pressure.

7. Maintain constant solution tank agitation during the injection period.

8. Stop injection equipment after treatment is completed. Continue to operate system until the Ridomil Gold/Braavo solution has cleared the sprinkler head.

**Solid Set, Hand Move, and Moving Wheel Irrigation Equipment**

1. Determine the acreage covered by the sprinklers.

2. Fill injector solution tank with plain water and calibrate the flow rate of the system to deliver the contents of the tank over a 20 to 30-minute time interval.

3. Determine the amount of Ridomil Gold/Braavo required to treat the area covered by the irrigation system.

4. Add the required number of Ridomil Gold/Braavo soluble bags into the same quantity of water used to calibrate the injection period. (See Mixing Instructions section of this label.)

5. Operate system at the same pressure and time interval established during the calibration.

6. Inject Ridomil Gold/Braavo at the end of the irrigation cycle or as a separate application to maximize retention of the fungicide by the foliage.

7. Stop injection equipment after treatment is completed. Continue to operate the system until the Ridomil Gold/Braavo solution has cleared the sprinkler head.

**CARROTS**

Ridomil Gold/Braavo, when used as a foliar spray in a preventive disease control program, provides effective control of downy mildew and Alternaria leaf spot.

**Downy Mildew:** Apply 1½ lbs./A. Begin applications when conditions are favorable for disease, but before infection, and continue at 14-day intervals until the threat of disease is over. Under severe disease pressure, use other effective EPA-registered fungicides according to label directions between the Ridomil Gold/Braavo sprays.

Notes:

(1) To avoid possible illegal residues, do not apply within 7 days of harvest.

(2) You may make up to 4 applications of Ridomil Gold/Braavo per crop.

**COLE CROPS (BROCCOLI1, BRUSSELS SPROUTS, CAULIFLOWER2, AND CAULIFLOWER ONLY)**

1Broccoli, Chinese Broccoli (ga-lon, white flowering brocoli)

2Cabbage, Chinese Cabbage (right-heading varieties only)

Ridomil Gold/Braavo, when used as a foliar application in a preventive disease control program, provides effective control of downy mildew and Alternaria leaf spot.

**Alternaria Leaf Spot:** Apply 1½ lbs./A. Begin applications when conditions are favorable for disease, but before infection, and continue at 14-day intervals until the threat of disease is over. Under severe disease pressure, use other effective EPA-registered fungicides according to label directions between the Ridomil Gold/Braavo sprays.

Notes:

(1) To avoid possible illegal residues, do not apply within 7 days of harvest.

(2) You may make up to 4 applications of Ridomil Gold/Braavo per crop.

**CUCURBIT VEGETABLES**

*Cucumber, cantaloupe, casaba, crenshaw, honey dew melon, honey balls, muskmelon, Per- sam melon, watermelon, pumpkin, summer squash, winter squash, and cucurbits hybrids only.

Ridomil Gold spray in a preventive disease control program, provides effective control of many diseases of cucurbit vegetables. Avoid late season applications when plants reach full maturity or begin senescence.

**Downy Mildew:** Apply 2 lbs./A of Ridomil Gold/Braavo. Begin applications when conditions are favorable for disease, but before infection, and continue at 14-day intervals until the threat of disease is over. The full rate of a protectant fungicide should be applied between Ridomil Gold/Braavo applications. Avoid late season applications when plants reach full maturity and begin senescence.

**Anthracnose, Cercospora Leaf Spot, Gummy Stem Blight (Black Rot), Leaf Blight, and Scab:** Apply 2-3 lbs./A. Begin applications when conditions are favorable for disease, but before infection, and continue at 10 to 14-day intervals. Under severe disease pressure, alternate Ridomil Gold/Braavo sprays with other effective EPA-registered fungicides every 7 days.

Note: You may make up to 4 applications of Ridomil Gold/Braavo per crop.

**ONIONS – DRY BULB*, GREEN**, AND ONIONS GROWN FOR SEED

*Includes garlic, onions (dry bulb), and shallots (dry bulb).

**Includes green onions, leeks, spring onions or scallions, Japanese bunching onions, green shallots, or green eschalots.

Ridomil Gold/Braavo, when used as a foliar spray in a preventive disease control program, provides effective control of downy mildew, Botrytis leaf blight, and purple blotch.

**Downy Mildew:** Apply 2 lbs./A. Begin applications when conditions are favorable for disease, but before infection, and continue at 14-day intervals until the threat of disease is over. Use a compatible spreader-sticker at rates recommended on the product label.

**Botrytis Leaf Blight (Blast) and Purple Blotch:** Apply 2 lbs./A on a 14-day schedule and apply other effective EPA-registered fungicides between the Ridomil Gold/Braavo sprays, or apply 2 lbs./A of Ridomil Gold/Braavo on a 7-day schedule.

Notes:

(1) To avoid possible illegal residues, do not apply to dry bulb onions within 7 days of harvest or to green onions within 21 days of harvest.

(2) You may make up to 4 applications of Ridomil Gold/Braavo to dry bulb or seed onions.

(3) You may make up to 3 applications of Ridomil Gold/Braavo to green onions. If conditions for disease development are still favorable after making 3 applications of Ridomil Gold/Braavo, use other fungicides registered for disease control in green onions.

**POTATOES**

Ridomil Gold/Braavo, when used as a foliar application in a preventive disease control program, will provide effective control of late blight, caused by Phytophthora infestans, Pythium leak caused by Pythium spp. and pink rot caused by Phytophthora erythropoietica. Make applications of Ridomil Gold/Braavo in sufficient water to obtain thorough coverage for ground applications and in a minimum of 5 gals. of water per acre for aerial applications.

It is recommended that this product be used within an Integrated Pest Management Program. Also, vine-kil should occur 14 days before harvest.

**Late Blight and Early Blight:** Apply 2.0 lbs. of Ridomil Gold/Braavo per acre. Begin preventive applications early in the season when conditions are favorable for disease (before infection), but no later than when the plant foliage meets within the row uniformly across the field. In states other than FL, make up to 3 applications of Ridomil Gold/Braavo at 14-day intervals. In FL, only make up to 4 applications at 14-day intervals. The labeled rate of a protectant fungicide should be applied between Ridomil Gold/Braavo applications. Following the 3 or 4 Ridomil Gold/Braavo applications, apply the labeled rate of a protectant fungicide on a weekly schedule through the remainder of the season.

**Storage Rots:** Pythium Leak (caused by Pythium spp.) and Pink Rot (caused by Phytophthora erythropoietica). For effective control of these storage rots, Ridomil Gold/Braavo should be used in conjunction with other management practices such as crop rotation. Apply 2.0 lbs. of Ridomil Gold/Braavo per acre. Make the first application at flowering and another one 14 days later. If the field has a history of storage rot problems, make a third application 14 days after the second application.

Note: If applications of Ridomil Gold/Braavo are being made for late blight control that correspond to the timing of applications for storage rot control, additional applications for storage rot control are not needed.

Notes:

(1) To avoid possible illegal residues, do not apply within 14 days of harvest.

(2) In states other than FL, you may make up to 3 applications of Ridomil Gold/Braavo per crop. In FL only, you may make up to 4 applications per crop. (3) If conditions for late blight development are still favorable after making 3 applications of Ridomil Gold/Braavo, use other fungicides registered for late blight control in potatoes.

**TOMATOES**

Ridomil Gold/Braavo, when used as a foliar spray in a preventive disease control program, provides effective control of several tomato diseases. Make applications of Ridomil Gold/Braavo in sufficient water to obtain thorough coverage for ground applications and in a minimum of 5 gals. of water per acre for aerial applications.

**Late Blight and Fruit Rot Caused by Phytophthora spp.:** Apply 2.0 lbs. of Ridomil Gold/Braavo per acre. Begin preventive applications early in the season when conditions are favorable for disease (before infection). In states other than FL, make up to 3 applications at 14-day intervals. In FL only, make up to 4 applications at 14-day intervals. The labeled rate of a protectant fungicide should be applied between Ridomil Gold/Braavo applications. Following the 3 or 4 Ridomil Gold/Braavo applications, apply the labeled rate of a protectant fungicide on a weekly schedule through the remainder of the season.
Early Blight, Gray Leaf Spot, Gray Leaf Mold, and Septoria Leaf Spot: Apply 2.0 lbs. of Ridomil Gold/Bravo per acre. Begin preventive applications early in the season when conditions are favorable for disease (before infection). In states other than FL, make up to 3 applications at 14-day intervals. In FL only, make up to 4 applications at 14-day intervals. The labeled rate of a protectant fungicide should be applied between Ridomil Gold/Bravo applications. Following the 3 or 4 Ridomil Gold/Bravo applications, apply the labeled rate of a protectant fungicide on a weekly schedule through the remainder of the season.

Anthracnose, Alternaria Fruit Rot (Black Mold), Rhizoctonia Fruit Rot, and Botrytis Gray Mold: Apply 2.0-3.0 lbs. of Ridomil Gold/Bravo per acre. Begin preventive applications early in the season when conditions are favorable for disease (before infection). In states other than FL, make up to 3 applications at 14-day intervals. In FL only, make up to 4 applications at 14-day intervals. The labeled rate of a protectant fungicide should be applied between Ridomil Gold/Bravo applications. Following the 3 or 4 Ridomil Gold/Bravo applications, apply the labeled rate of a protectant fungicide on a weekly schedule through the remainder of the season.

Note: (1) To avoid possible illegal residues, do not apply within 14 days of harvest. (2) In states other than FL, you may make up to 3 applications of Ridomil Gold/Bravo per crop. In FL only, you may make up to 4 applications per crop.

### ROTATION (PLANT BACK) RESTRICTIONS

Do not plant any crop which is not registered for use with the Ridomil Gold active ingredient in soil treated with this active ingredient for a period of 12 months, unless a shorter interval is specified on the following list.

<table>
<thead>
<tr>
<th>Rotation Crop</th>
<th>Planting Time From Last Application of Ridomil Gold/Bravo</th>
</tr>
</thead>

*These crops may be planted immediately following last application of Ridomil Gold/Bravo, provided they will not bear harvestable fruit within 12 months.

### STORAGE AND DISPOSAL

Storage
Store in a cool, dry place. Do not store this product under wet conditions. Handle outer packaging carefully to avoid breakage of inner soluable bag.

Pesticide Disposal
Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Wastes resulting from the use of this pesticide are acutely hazardous. Improper disposal of unused pesticide, spray mixture, or rinseate is a violation of federal law. Pesticide, spray mixture, or rinseate that cannot be used according to label instructions must be disposed of according to federal, state, or local procedures.

For guidance in proper disposal methods, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office.

Container Disposal
Do not reuse outer container. Dispose of empty outer container in a sanitary landfill, by incineration, or, if allowed by state and local authorities, by burning. Stay out of smoke from burning bags.

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes. In the event of a major spill, fire, or other emergency, call 1-800-888-8372, day or night.
