Talinor plus Axial brand herbicides
A complete solution for efficient, one-pass weed control

Multiple modes of action are key to one-pass weed control in wheat and barley. Now growers can get efficient, one-pass grass and broadleaf weed control with multiple modes of action by tank-mixing Talinor™ with Axial® XL or Axial Star herbicides. Talinor and Axial brands are excellent tank-mix partners, together controlling the most yield-robbing grasses and broadleaf weeds.

**Talinor plus Axial brand tank mixes offer:**
- Superior cross-spectrum control of annual grasses and broadleaf weeds
- Efficiency and convenience of one-pass weed control
- A wide window of application from two-leaf to pre-boot stage of crop
- Multiple modes of action to help manage resistant weeds
- Rotational crop flexibility for the following season
- Excellent rainfastness and crop safety
