For Reliable, Easy Broad Spectrum Insect Control in Cotton, Tobacco and Pasture

For a modern insecticide that provides reliable, broad-spectrum control of damaging pests, trust Besiege® insecticide. Besiege gives growers the knockdown and the long-lasting residual they need to control difficult lepidopteran pests and other economically important pests in cotton, tobacco and pastures. With dual modes of action and a convenient premix formulation, Besiege is the easy way to protect your crops and your bottom line.

**Features**

- Contains two active ingredients, chlorantraniliprole and lambda-cyhalothrin, at robust rates
- Provides excellent knockdown and long-lasting residual control of difficult worm pests like soybean looper, cotton bollworms, armyworms, tobacco budworm, tobacco hornworm and corn earworm
- Provides excellent control of worm pests on conventional or traited cotton
- Controls additional economically important pests in target crops (eg. stink bugs and beetles)
- Multiple modes of action provide insect pest control by contact, ingestion and ovicidal action
- Offers powerful insect control
  - Consistent, robust performance on the most difficult pests:
    - Soybean looper
    - Cotton bollworm
    - Tobacco hornworm
    - Corn earworm
    - Tobacco budworm
    - Stink bugs
    - Armyworms
  - Highly effective on lepidopteran species with emerging resistance to traits or other chemistries (e.g. pyrethroids)
Benefits

- Broadens and strengthens performance
  - Two active ingredients broadens the spectrum of control
  - Strengthens performance and provides a consistent, high level of control of difficult to control lepidopteran pests
  - Controls other insects such as stink bugs and beetles, that impact yield and quality

- Easy to use
  - An easy decision: one product provides multiple benefits
  - Easier handling: fewer containers to store, handle and dispose
  - Reduces the hassle of tank-mixing: fewer calculations and potential mistakes
  - Easier compliance: one label provides all the information you need (e.g. rates, PHI, REI, PPE)

- Optimizes value for grower
  - Robust performance ensures optimal yield and quality
  - Consistent and reliable performance and service

Use recommendation

- Apply Besiege preventively, before pests reach damaging levels
- Apply by ground or aerial application
- See label for pest- and crop-specific information, including rates and PHI
- REI = 12 hours
