Miravis Prime fungicide for potatoes

Technical overview:
Miravis® Prime fungicide, registered for use on potatoes, is a combination of the active ingredients fludoxonil (FRAC group 12) and Adepidyn® fungicide – a broad-spectrum SDHI molecule within FRAC group 7. Miravis Prime sets a new standard versus previous products in its class for spectrum and performance and delivers excellent disease control against early blight, white mold and other diseases.

Miravis Prime technical features:
• Provides excellent activity in spray programs against several difficult-to-control diseases
• Complements integrated pest management spray programs
• Accumulates heavily into the wax layer and translocates through the leaves
• Remains stable on the leaf surface for even distribution and protection

Key diseases controlled:
• Early blight
• White mold

Miravis Prime efficacy on early blight vs. current standard

Miravis Prime 6-Spray Program: CruiserMaxx® Potato Extreme (A), Bravo® (B.G), Miravis® Prime (C, E), Revus Top® (D, F)
Luna Tranquility 7-Spray Program: Bravo (A, C, E, G), Luna® Tranquility (B, D), Revus Top (F)
Miravis Prime provides excellent control of early blight vs. current standard
