Fast, Multiple-action Performance for Quick Results, Powerful Insect Control and Versatility

Voliam Xpress® insecticide provides quick knockdown and long-lasting residual control of lepidopteran pests and a wide array of other damaging insect pests. It is available in a convenient and economical pre-mix formulation that reduces the hassle of tank-mixing and provides a good value for the grower. For quick, reliable and versatile control of tough pests in head and stem brassicas, cucurbit and fruiting vegetables, head and leaf lettuce, pome and stone fruit, sweet corn and tree nuts, choose Voliam Xpress.

THE VOLIAM XPRESS ADVANTAGE

> Broadens and strengthens performance
> Provides both quick knockdown and long-lasting residual control
> Multiple-action performance results in more ways to protect your investment
> Removes the hassle of tank-mixing: saves time, fewer calculations, reduces chances for mistakes, reduces exposure
> Easier compliance – one label has all the information needed to meet federal and local regulations
> Optimizes ROI by providing a better value than competitive products or tank mixes

APPLICATION METHODS

Ground Application
Apply Voliam Xpress using sufficient water volume to provide thorough and uniform coverage. In situations where a dense canopy exists and/or pest pressure is high, use greater water volumes. The use of a spray adjuvant may improve spray coverage but is not required. Avoid making applications under conditions where uniform coverage cannot be obtained or where excessive spray drift may occur.

Aerial Application
Apply Voliam Xpress in water, using the minimum spray volume indicated for each crop group. Increase the spray volume where practical to improve coverage. Avoid making an application under conditions where uniform coverage cannot be obtained or where excessive spray drift may occur.
