Protect Against Cucurbit and Fruiting Vegetable Diseases with Two Powerful, Complementary Chemistries
A Top Choice for Disease Management

Growers looking for top-level disease control for cucurbits and fruiting vegetables can turn to Aprovia® Top fungicide.

Powered by two active ingredients, Solatenol®, fungicide and the highly effective difenoconazole, Aprovia Top provides excellent disease control by preventing spores from infecting and stopping fungal growth in the leaf for existing infections. In addition, with two modes of action Aprovia Top serves as a valuable resistance management tool.

A proven tool for disease prevention, Aprovia Top provides enhanced, broad-spectrum control of powdery mildew, early blight and gummy stem blight. Including Aprovia Top in your disease management program will help improve marketable yields and profit potential.

Untreated vs Aprovia Top for early blight control.
Note healthier, greener plants.

Powdery mildew on the untreated (left) causes chlorosis and defoliation. Aprovia Top (right) keeps leaves full and green with less defoliation.
Aprovia Top Efficacy against Gummy Stem Blight

Aprovia Top delivers exceptional Gummy Stem Blight control.

Gummy Stem Blight/Watermelon

Aprovia Top helps maximize yield potential by preventing powdery mildew development and infection on pumpkins.

Powdery Mildew on Pumpkins

Aprovia Top helps maximize yield potential by preventing powdery mildew development and infection on pumpkins.
Technical Attributes

- Broad-spectrum disease activity
- Versatile tank-mix option
- Excellent preventive activity
- Outstanding rainfastness
- Binds to waxy layer for long-lasting control

Directions for Use

Growers can turn to Aprovia Top for superior preventive disease management in cucurbits and fruiting vegetables.

- For control of powdery mildew and gummy stem blight on cucurbits; and early blight, *Septoria* and powdery mildew on fruiting vegetables (tomatoes, peppers), apply Aprovia Top at a recommended use rate of 8.5 to 13 oz/A.
- For best results, apply in alteration with other modes of action.
