Dicamba can be added to recommendations below for glyphosate broadleaf weed-resistant populations. 2For easy-to-control, non-glyphosate-resistant grass; light weed populations. 3Check with your local Syngenta representative or retailer for correct adjuvants. 4Add Accent at the time of application if there is emerged grass.

Iowa, Minnesota, North Dakota and South Dakota

As weeds continue to develop resistance to glyphosate and other herbicides, growers have to modify and diversify their weed management programs. Resistance Fighter® from Syngenta provides education, a comprehensive herbicide portfolio and local recommendations that help growers and retailers effectively manage resistant weeds in their specific area.
