

A photograph of two men in a field of green plants. The man on the left is wearing a light-colored polo shirt and shorts, and the man on the right is wearing a maroon polo shirt and dark pants. They are both leaning over and examining the plants closely. The background shows a clear blue sky with some clouds.

Working together
toward your success

syngenta[®]

But 'good' is
never good
enough.

Most growers would say our business at Syngenta is about crop protection, seeds, seed treatments and traits.

And they'd be right: we're a global leader at providing these essential inputs to growers.

We invest over \$1.3 billion per year in global R&D to bring growers new, advanced, innovative technologies that address their challenges – today and tomorrow. That’s nearly \$3.7 million per day! It’s a big commitment – to agriculture and to you.

A photograph of a modern greenhouse interior. The space is filled with rows of young green plants, likely cucumbers, growing in black plastic pots. The plants are arranged on white raised beds. The greenhouse structure is visible in the background, with large windows allowing natural light. A central orange text box is overlaid on the image, containing text about Syngenta's services.

When you talk to a Syngenta retailer, Golden Harvest® Seed Advisor™, or one of our sales reps or field agronomists, the conversation is about you – your fields, your plans, your challenges, your business.

Can we help you be more efficient, control pests better, cope with bad weather, break through yield barriers, bring in a profitable harvest? With our industry-leading portfolio and our commitment to innovation and collaboration, the answer is usually yes.

But we know that how we work with you is just as important as the technologies we develop. As critical as it is to bring you great products, what really matters is helping you to succeed.

So we believe in giving you choices, not limitations. Tools, not barriers. Collaboration, not manipulation.

we believe
in giving you
choices, not
limitations

syngenta®

We believe in delivering better food for a better world through outstanding crop solutions. We are devoted to a better way to help growers do more with less. We take pride in meeting our commitments to our stakeholders.

Our goal is to be the leading global provider of innovative products for every step of the agronomic process and to understand their interplay and optimize the results for growers and the food chain.

Crop Protection

- 145 products for the U.S.
- Used in more than 200 crops and plants
- New products and mixtures, season after season
- Fighting resistance

Seeds

- Dozens of new hybrids and varieties each year
- Yield Engineering System™ (Y.E.S.) drives gains
- Top-performing Agrisure® corn traits
- Enogen® corn for ethanol production
- Corn, soybeans, wheat, vegetables, sugarbeets, sunflowers, alfalfa
- Flowers, Home & Garden

Key Initiatives

- AgriEdge Excelsior® whole-farm management
- Operation Pollinator
- The Good Growth Plan

we believe
in delivering
better food
for a better
world
