Miravis Prime fungicide for grapes

Technical overview:
Miravis® Prime fungicide, available for use on grapes, is a combination of fludioxonil (FRAC group 12) and Adepidyn® fungicide (FRAC group 7). Adepidyn fungicide is a carboxamide molecule with an SDHI mode of action that provides more power and stamina for long-lasting disease control.

As a powerful disease management tool for growers, Miravis Prime sets a new standard in its class for spectrum and performance, and provides excellent control against key diseases like Botrytis and powdery mildew.

Miravis Prime technical features:
- Powerful active ingredients deliver excellent disease control
- Complements integrated pest management disease programs
- Accumulates heavily into the wax layer and translocates through the leaves
- Remains stable on the leaf surface for even distribution and protection

Key diseases controlled:
- Alternaria rot
- Angular leaf spot
- Anthracnose
- Black rot
- Botrytis
- Leaf blight
- Phomopsis cane and leaf spot
- Powdery mildew
- Rotbrenner
- Septoria leaf spot
