

# SEASON-LONG SCN CONTROL. CONVENIENT PREMIX SOLUTION.

When high-value seed is on the line, assure your growers that their seed treatment not only provides proven protection from soybean cyst nematode (SCN) but also offers a best-in-class planting experience with less seed sticking to and clogging their planters. Clariva® Elite Beans seed treatment offers the only **season-long, lethal** SCN protection currently on the market and helps improve your application experience and treater efficiency with its advanced formulation.

## Why Clariva Elite Beans?

- Offers the only **season-long activity against SCN** in the entire root zone with its potent active ingredient, *Pasteuria nishizawae*
- Available as a **stable** and **easy-to-handle** engineered premix of Clariva pn nematicide and CruiserMaxx® Vibrance® seed treatment
- Provides little to no thickening compared to the old combination
- Contains nematicide spores that are stable and effective for **up to two years** of storage
- Optimizes the RootingPower of Vibrance and the Cruiser® Vigor Effect for better emergence, stand, stress tolerance and overall performance
- Combines with Mertect® 340-F fungicide for increased activity against sudden death syndrome
- Used at only 2.6 fl oz/140,000 seeds
  - This adds flexibility for customers wanting to add inoculants and proprietary enhancements to their seed treatment packages without overloading the rates on the seed

Clariva Elite Beans\*

Untreated check

Compared to custom blends, this engineered premix will help make treating seed more time- and cost-efficient for you while continuing to deliver season-long protection against the No.1 yield-robbing soybean pest for your customers.
