## Fast-acting, Effective Harvest Aid

Condition and desiccate your cotton crop with only the best this harvest season. Whether used alone or in combination with other harvest aid products, Gramoxone<sup>®</sup> SL 3.0 herbicide has a fit in any operation with its flexibility, efficiency and strong performance results.

### Application Information

Conditioning and desiccation recommendations for Gramoxone SL 3.0 are customized by region in Texas. Contact your local Syngenta sales representative to develop a custom prescription program for your operation based on the general recommendations below.

#### Blacklands and South Texas

**Conditioning one-two punch:** Tank mix ethephon plus Gramoxone SL 3.0 at 2 to 7.5 fl oz/A in first application, then apply Gramoxone SL 3.0 at 16 to 21.3 fl oz/A in second application made 7 to 10 days later.

**Desiccation application:** Apply Gramoxone SL 3.0 at 10.6 to 21.3 fl oz/A. Use higher rates for stripper cotton and excessive cotton growth.

**Regrowth suppression:** To assist in regrowth suppression, apply Gramoxone SL 3.0 at 10.6 to 21.3 oz/A in combination with regrowth suppression products like Sharpen<sup>®</sup> powered by Kixor<sup>®</sup> herbicide per their label rates.

**Boll opening:** Apply at 21.3 fl oz when 85% of the cotton bolls are open and the remaining bolls to be harvested are mature.

### Product Benefits

Backed by a large expert staff of local sales and technical representatives, Gramoxone SL 3.0 delivers outstanding results and superior value with excellent product support and customer service.

- Fast-acting results in as little as 48 hours
- Economical harvest aid option
- Helps dry and condition cotton for extended module storage
