

For Dual Action, Broad Spectrum Insect Control In Tree Nuts

Besiege® insecticide provides dual-action protection against the most difficult lepidopteran pests plus offers broad spectrum performance against other damaging insect pests in almonds, pistachios, and walnuts. With two active ingredients in a convenient premix formulation, Besiege is the easy way to protect your crops and your bottom line.

Features

- Two active ingredients:
 - chlorantraniliprole (Group 28)
 - lambda-cyhalothrin (Group 3)
- Excellent knockdown and long-lasting residual control of difficult lepidopteran pests including adult moths
- Broad spectrum control of additional tree nut pests
- Insect control by contact, ingestion and ovicidal action

Benefits

- Control of a broad spectrum of pests economically important in tree nuts
- Zeon® formulation technology for consistent performance under various conditions
- Premix formulation increases ease of use: fewer containers to store, handle and dispose
- Wide variety of compatible tank mix options

Navel Orange Worm

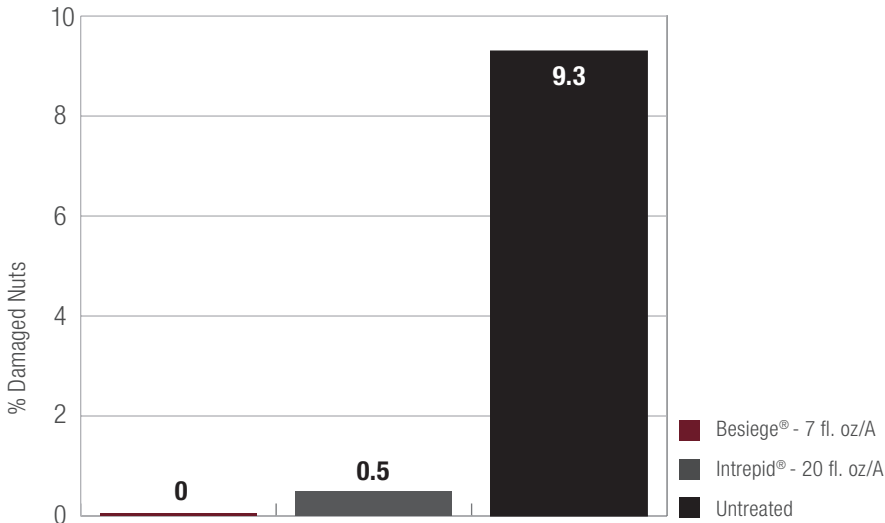

Codling Moth

Peach Twig Borer
